

bio+ amino

Organic Plant Nitrogen

-  Natural source of organic nitrogen.
-  Boosts plant growth and improves yield.
-  Increases plant ability to uptake water and essential nutrients.
-  Stronger plants, resistant to environmental stresses, pest and disease attack.

Bio+ Amino is a unique product delivering all the building blocks required for stronger healthier plants and improved soil fertility. This 100% certified organic based product provides a 10% nitrogen boost along with 19 amino acids essential for promoting healthy growth. Bio+ Amino allows plants to withstand and recover from harsh climatic conditions including heat stress, frost, drought, wind and salinity. Within the soil profile Bio+ Amino works to unlock antagonisms, drives enzymatic responses and chelate minerals making them more readily available for uptake. Compatible with most commonly used fertilisers, pesticides and chelates.
