

# bio<sup>+</sup>wetta™

## Organic Soil Wetter

AVAILABLE IN

### TYPICAL ANALYSIS

**100% PURE  
Yucca  
Schidigera  
Concentrated  
Plant Extract**

-  **Distributes water evenly through soil profile.**
-  **Cost effective water saving and irrigation time.**
-  **Retains water and nutrients at root zone.**
-  **Reduces run-off.**
-  **Safe to use as soil drench or addition to fertigation systems.**

Bio<sup>+</sup>Wetta is a Certified organic wetting agent that acts to reverse the effects of hydrophobic soil. Derived from 100% *Yucca schidigera* concentrated plant extract, the foaming quality works to coat and break down waxy organic residues on hydrophobic soil particles allowing for efficient water and biostimulant dispersal to the root zones. Bio<sup>+</sup>Wetta applications are for use in gardens, agricultural and horticultural applications which increases water absorption and distribution throughout soil profiles.

### Suggested Application Rates

#### SHAKE WELL BEFORE USE

Wet Soil before & after application for improved absorption.

#### Foliar & Irrigation

Standard Solution 250ml/ha  
Reduced Solution 250ml/ha

#### Native Plants

5ml in 1L water  
All year round

#### Vegetables

5ml in 1L water  
All year round

#### Lawns

9ml in 1L water  
All year round

#### Outdoor Plants

Limit for all other plants  
50ml in 10L water  
10 - 14 days

#### Transplanting

30ml in 10L water  
Dip roots in solution
